

Letter 31  
**The Day of 7 - Part 9**  
**The Removal Of Leviathan**  
2011-10-28

Dear Dan

Sometime after January of 2000 the Lord opened my eyes to see a spirit, or in this case a twisted set of three spirits that the Lord called "Leviathan". This entity was seated on my wife's TV chair in the family room.

Our TV chairs in the family room were situated so that (M) and I were facing one another with the TV to one side, in this case to my left and her right, so that we would have to turn our heads to watch TV. I noticed that as I would watch TV, my peripheral vision could see my wife's head turned toward the TV, but I could also see another face looking straight ahead at me.

I wondered at this for some time, even days. Then one night after (M) had retired for the night the Lord directed me to sit in my wife's chair. I kind of had an idea as to where this was going since I had already some experience with this with the removal of familiar spirits at work.

I sat down on the chair and somehow took Leviathan into my body. Then I went out onto the back deck and expelled the devils into the Lord's hands, Who removed the enemy forthwith.

The next day I could tell that things were better between my wife and me. There was better communication between us, an absence of underlying anger (which to my wife's credit never really manifested as she was stronger than the evil spirits), and no more demonic aliens sitting in my wife's TV chair. Praise God.

I don't know exactly how long Leviathan was in our house. I do know that I have a tendency to spend more time than necessary analyzing things. One time while I was sitting in the family room I could feel something like a burst of evil shoot at me from Leviathan. Gabe said that I had just taken a "hit". Another time Gabe jumped in front of me and took a hit on my behalf. This happened quickly but I could still see it occur. (This why I can call Gabe my friend. He took a bullet for me).

It was not long after that Leviathan was removed.

Something else happened in the family room. Jesus was with us and I had gone out into the kitchen and was coming back in when I stumbled and started to fall over. I put my hand out to steady myself against one of those newer wooden style TV trays. Of course, it was not strong enough to hold me up under a diagonal force, so over I went, breaking the TV tray in the process. I did not get hurt because Gabe controlled and slowed my fall.

Then Jesus said that there were had been a few demons left in the family room, and that He had put them into the TV tray while it was breaking. I was given specific instructions on how to deal with them. I put the broken pieces into a black plastic trash bag and tied a knot at the top to securely close it. Then I put the bag in the back of my Chevy S-10 Truck.

Later, we went out for coffee to a restaurant. As I was walking past the bed of my truck I heard what sounded like one of the wood parts in the bag hitting another, not many times but twice. Jesus said that the demons were getting restless and causing the wood to move a little. After coffee we threw the bag into the dumpster outside. The demon possessed TV tray most likely ended up in a landfill someplace in Oregon.

Wherever they are so they shall remain until Judgment.

Blessings...

Romanus Theophilus
