

Letter 936
**Our Most Excellent Trial And Journey
Through The Valley of The Shadow of Death**
"When You're Going Through Hell, Keep Going"
2025-12-18

Dear **Yeshua**,

Monday, 3 November 2025, 5:37AM

One year ago this month, my wife (M) became hospitalized. And for the next year up until now, she has spent most of this time at a medical facility.

Please permit me to explain.

Wednesday, 17 December 2025, 5:52AM

Below is a redacted Letter I wrote to (M) and myself explaining what has taken place since the Fall of 2024.

**BEGIN LETTER:
7 December 2025**

Dear Beloved Wife (M),

Here is an historical list of what has happened to us up until now, as we walked together with **Jesus** through the Valley of The Shadow of Death.

1) Oct 2024: It became increasingly more and more difficult for you to get out of the water bed. At one point you spent two days and three nights in bed. We then called for the Fire Department to help get you out of bed.

2) Nov 2024: One day you said that it was hard for you to breathe, and needed to go to the hospital. I took you to (G32) ER. They did not have the right equipment do to a CT scan, so they sent you to (G6) Hospital. You spent about 2 weeks at (G6). It was then that they discovered a **cancerous tumor** on one of your kidneys, which was later **diagnosed as malignant**, but inoperable due to your other conditions. At this time you were still able to walk with the walker and get in and out of the car.

3) Jan-Feb 2025: After coming home from (G6) in November, you spent many days and nights in your TV chair. In late January I started to dismantle the water bed. At the same time we ordered a new bed from Costco. This is when you started to retain water in your legs. At one point you were not able to stand very well, so we called emergency services, and they took you to (G6) again. You stayed about 2-3 weeks. They removed about 50 lbs. of water. It was also then that you were diagnosed **with congestive heart failure**. (This was in addition to the Arterial Fibrillation disease you already had.)

The new bed was delivered and set up while you were at (G6). After getting back home, you were still able to get out of bed, with my help, and use the walker to get to the bathroom and the TV room. I would walk behind you holding on to your gait-belt to provide stability.

4) 25 June 2025: It was on this day that you fell in the bathroom against the bathtub and really got bruised pretty badly. We determined the best course of action was for the EMTs to transport you to (G32) Hospital.

5) Jun-Aug 2025: You were a patient at (G32) for 6 weeks. During this time you seemed to improve. However, the staff at (G32) “dropped” you at least three times. The second time you were hurt pretty bad. This extended your stay by about two weeks. For some reason you began to hallucinate(**note) at (G32). The hallucinations continued after you returned home in August.

6) August 2025: You came home from (G32) around the first of August.. The transport driver was able to help me get you into your TV chair. I figured that you would be able to walk with the walker back to your bed after resting. But after about an hour, with you still in a hallucinatory state, you tried to get out of your TV chair without my help. I found you sort of sitting half way, about to fall down to the floor. I called 911 for help in getting you to your bed. But when the EMTs arrived, the EMT Leader determined that you needed to go the the ER. So, they took you back to (G6) ER. The ER doctors determined that you could go back home. This time, there were 2 Patient Transport Technicians. They were able to help get you into your bed. Later after I went to sleep, I heard you yelling my name. I got up and found you trying to get out of bed, with your legs dangling off of one side of the bed. I was able to get you back into bed. You said that you were trying to get up and go the bathroom.

Since coming home from (G32), you have not been able to stand and walk, even with a walker, though you did stand twice at home at the side of the bed, and a few times at the nursing homes).

7) September 2025: At the end of August and into September you were still hallucinating off and on. This, along with other issues, prompted us to call the Emergency Nurse line on the back of your Medicare Supplemental Insurance card, which we did on Saturday, 13 September. After asking a bunch of questions, the Nurse said that you should be seen by a doctor within the next 24 hours. So, the next day, we called once again for emergency services to take you back to (G6). This time you stayed less than a week. The Social Worker referred you to a nursing home (G33), so that you could receive physical therapy in the hopes of helping you to regain the strength needed to walk with a walker. After about 2 weeks, we decided to try to move you to a nursing home closer to home. We found one in (L11), and on the 9th of October you moved to (G34). It was here that one of the physical therapists diagnosed that you could not walk due to crippling arthritis in both of your knees.

(G34) is where you stayed until you returned home on Sunday, 30 November 2025.

(**Note) We learned that one of the medications you were given at (G32) could cause hallucinations, as well as urinary tract infections. You had both.

END LETTER.

Many Blessings, and Much Shalom...

R. C. Theophilus
