

Letter 136
***** A Few More Editorial Notes *****
2012-09-02

Dear Dan,

I have just finished looking over all the letters. While I made several corrections and modifications, nothing really represents any fundamental change from what I have already sent to you.

I did see some loose ends, but for now they will be placed in the “roundtuit” file.

Almost all the letters in Volume 5 were renumbered to correspond with the print and post dates.

Rather than a table of contents, I have included in the .PDF versions the Letter Sequence Table, at the end of each volume. Included with this letter is a CDROM with the .PDFs along with other supporting documentation.

As of now there are about a half dozen more topics for additional letters that I have been reminded of. They are also with the loose ends in the “roundtuit” file.

And we are still planning on producing the audio version. I think that is what’s next.

Blessings...

R.C. Theophilus
