1997 Dodge Intrepid

2006 Chrysler 300 HEMI-C

Dear Dan,

(M) and I purchased a 2006 Chrysler 300 on 9 February 2015, to replace her 1997 Dodge Intrepid, which was damaged in a collision on her birthday, 30 January 2015, and declared a Total Wreck by the Insurance Company. We discovered the Replacement Car at the Dealership on the 8th of February, making a verbal promise to return the next day to finalize the purchase. Over the ensuing weeks since then the Lord has been highlighting various aspects of the vehicle, and the processes that came about to our ending up with such a remarkable Cruiser.

In this memo I will write down some bullet points, and then expand on them in the days to come.

1) MAKE: Chrysler

2) MODEL: 300 HEMI-C, 4 Door Sedan.

3) YEAR: 2006. Saddam Hussein executed in December of that year. My first DEADHEAD bus ride, with a major power outage occurring that night. Hanukkah Eve windstorm of 15 December 2006. Fourteen people were killed in Western Washington. One of them was 41-year-old voice actress Kate Fleming (aka Anna Fields) who was trapped in a flooded basement in Seattle's Madison Valley. 2006 Suzuki Calendar in my closet at work.

4) MILES: 95,500

5) ENGINE DISPLACEMENT: 345 cubic inch (5.7 Liter)

"The HEMI engine includes a pushrod induction tube, located on the side of the engine-block. This tube makes the 300C more fuel efficient and quicker, because of the air being "pulled and pushed" into the engine's induction area. The engine uses the HEMI, or double rocker configuration, with a cam-in-block, overhead valve (OHV) pushrod design. There are two spark plugs per cylinder to assure complete fuel/air mixture burn and decrease emissions." (From WIKIPEDIA).

6) HORSEPOWER: 340.

7) COLOR: Pure White.

8) FUEL ECONOMY: 18 MPG average (see Revelation 18).

9) MULTIPLES OF THREE: the need arose on the 30th. The purchase was made on the 9th.

10) SPEEDOMETER TOP DEAD CENTER: 80 MPH.

11) DUAL ELECTRIC SEAT/ MIRROR/ RADIO COMFORT SETTINGS

12) DUAL HEATED SEATS

13) DUAL AUTOMATIC ENVIRONMENTAL CONTROLS

14) INPUT JACK FOR AUXILIARY AUDIO COMPONENTS

15) LOTS MORE TO FOLLOW...

Blessings...

R. C. Theophilus
