

Letter 357
DREAM / VISION
Mountain In The Sky
2015-06-14

Dear Dan,

There was another dream I had in July of 1995 while I was at Harborview. For some reason I did not document it at the time along with the rest of the dreams and visions. But now the Lord wants it to be written down.

This dream happened at the end of Dream #4 (*Part Two, The Tower*), but before Dream #5 (*Satellite Dish Mandate*). (See Letter 261 Volume 514)

In this dream...

Suddenly I found myself in a different place. I was no longer surrounded by the wreckage of the collapsing tower of the hospital where I had been hunted and chased by the staff so they could kill me.

Instead, I found myself looking down from a doorway that was at the base of a mountain. But the Mountain was floating in the sky, about 100 feet above the Hospital and Tower.

The doorway had protruding in front of it a small porch or veranda where one could stand outside and look at the scenery. It was much like being in a hot air balloon. Just floating.

Somehow, I had been transported away from the top of the Hospital Tower just in time to escape all the wreckage that I had just caused by firing my Grease Gun into the supporting structure of the building.

I remember in the dream of wondering how I escaped such destruction, but grateful that I had.

End of dream.

Blessings...

R. C. Theophilus
