

Letter 410
INTERACTIVE VISION
The Coffee Shop
2015-10-26

Dear Dan,

Sunday 25 October 2015 5:45AM.

A few weeks ago, on Friday the 9th of October, while at work the Holy Spirit gave me a vision. This was what I call an interactive vision. While I was busy working at cleaning surgeries, suddenly I also began to see myself being the owner of a Coffee Shop/Family Style restaurant.

This vision was so pronounced that it lasted all night. And I could “step into” the reality of the vision to whatever degree of presence that I wanted, as the work-flow of the night’s activities would allow.

I left the interaction of the vision over the weekend, but during the next work week I would “step back in” to the vision from time to time. I began to dream details of hiring employees, what the menu might look like, and the exterior facade of the building. I dreamed of hiring young people that I could train and teach. And I resolved to have a reserve dining room that I would open up weekly for Bible Studies and Prayer Meetings.

I was very comforted by this vision. Since I was the owner of the business, I was able to set policy. I have never liked working at (G6) because I cannot work to any potential of the earthly vocational gifts that God has given me. For the past fourteen years they were either laying dormant, or being destroyed by Satan. (G6) has been nothing but a curse and a mausoleum to me, until most recently when I could see actual Kingdom influences in other people, such as documented in Letter 390 Volume 5-15. Yet the paycheck has been a blessing to my wife and household, and me.

I had never thought of owning a cafe before, mainly because I know how much work there is to run such a business. But I actually do have some history working in food service. I was a cook in the Army National Guard. Actually I was the First Cook, Staff Sergeant E-6, and during summer training camps was responsible for feeding an entire battalion of hungry and well-deserving soldiers.

Still, I wonder if there is a Kingdom “what if” scenario in this vision. In this vision I am the owner, which means I have the funds and resources to hire out all the work to employees and vendors.

I like organizing. I enjoy problem solving, and I know how to manage money. So this would actually be easy for me to do, without being boring. And I like to cook. Plus it helps that my culinary senses are still sharp. I even went so far as sharing this with (M), saying that I would call it “(RC)’s Coffee Shop”.

So. Let's see if this goes anywhere. I know I sure would... like to go... outta (G6), that is.

Blessings...

R. C. Theophilus
