

Letter 415  
**Supergirl And The Fantastic Five**  
2015-11-15

Dear Dan,

**Friday 13 November 2015, 6AM.**

This week the Lord dispatched five more angels from Heaven to help out at (G6) Hospital. They arrived at work about 11:30PM this last Wednesday, 11 November, and have been receiving anointing, instruction, and training from angel Beniah (see Letter 408 Volume 5-15), on identifying, disabling, and/or removing familiar spirits. Beniah has accepted the nickname "Supergirl". Yup, after the new TV show.

I was informed about this Wednesday night when I was getting ready for work. Angel Gabe started to tell me this (real good) news when I was shaving. After I assimilated this data, I got really happy. This meant that I no longer would have to worry about familiar spirits getting in my face (literally) at work any more. Hallelujah. Thank you Jesus.

About two years ago the need for something like this became really apparent when I would pass another worker in the hallway as he was arriving to work. He would park in the parking garage and, after getting inside the building proper would sometimes pass me in the hallway, and when he saw me he would greet me by saying; "there's Romanus", or "it must be Romanus", or words to that effect. He would always phrase his greeting in the third person while using my first name. I also saw that when he did this he had a funny grin on his face. Finally I had enough and sent him an email stating that I didn't like how he was speaking to me. He stopped immediately after that, and we never spoke about it, other than at one point he acknowledged receipt of the email.

But while this was going on I would inquire of the Lord, and ask angel Gabe what exactly was going on. Gabe answered that the parking garage was a staging area for familiar spirits being sent into the hospital. So one day we went down to the parking garage and walked over to a caged utility area where the demons would congregate, and cast them out. But later on they just came back. It wasn't until angel Gabriel showed up that a more permanent solution was applied.

But familiar spirits coming into the hospital are still a problem, so much so that the Lord decided to send a crew of five angels on permanent assignment at (G6) to help keep things clean.

When I get a chance in a future letter I will address how familiar spirits are a little different from your average, weed-garden variety demon. Also, the reason there are so many of them at this point has to do with abortion. Abortion clinics are open doors from hell for demons to enter Delta1 time/space. As Jesus' ministry of forgiveness expands and grows, these portals will be closed shut. Meanwhile, He is "removing the enemy from the land", those that have already entered. This is part of the job of the angels that are being sent to earth at this time. And this effort is being personally overseen by angel Gabriel. Sounds like "Kingdom Come" to me.

Blessings...

R. C. Theophilus
