

Letter 448  
**VISIONS**  
**Some Cooling Is Needed. Drying Up The 90%.**  
2016-03-07

Dear Dan,

During the week of 21-27 February I had two visions that were part of putting the Dominatrix to sleep (see Letter 447 Volume 6). After getting her house sealed, I noticed by vision that it was starting to turn red, and I knew it was overheating. So I asked the Holy Spirit to have some heat-exchanging radiators installed against all the exterior walls of the house, and filled with (the spiritual version of) liquid helium. Then I requested the Lord to send angels certified in refrigeration to operate and maintain the equipment.

This worked and I saw the house of the Dominatrix begin to cool off almost at once. Afterward angel Gabriel and I had a conversation that went something like this:

**Me:** What was up with the house getting all hot?

**Gabriel:** There were some of her house-guests trapped in the house with her when she was put to sleep and you had all the doors and windows sealed shut. This constituted 10% of all of her personal resources. They hate each other so much that the house was getting hot with their rage with one another, blaming each other and you for their predicament.

**Me:** It seemed wise to me to keep the house cool. Sealing the house and posting a warning sign wasn't supposed to be a punitive move, but a way to keep other people from stumbling into her house and becoming poisoned with the voices of her people.

**Gabriel:** Right. This was a move of compassion on your part in making provision to keep the house cool, so they do not suffer any more than they already do in their own sin. The Lake of Fire will be their just punishment.

**NOTE:** Not long after this I had another vision. In this vision I saw one of the Dominatrix's people who had been sealed outside of her house. He looked like he was skinny and gaunt.

**Me:** So, what about the 90% of her people that got sealed outside of the house?

**Gabriel:** They will eventually all become dehydrated and not be able to function. Being cut off from their source of energy, the Dominatrix, has a debilitating, drying out effect.

**Me:** Roger that.

Blessings...

R. C. Theophilus
