

Letter 515
NoWhereLand
 2016-09-23

Dear **Jesus**,

Wednesday, 21 September 2016, 6AM.

At work last night I started to think that my job at (G6) was “nowhereland”*. This was because there were several things happening at once.

1. I was in pain and the pain was increasing.
2. I felt strange in my soul, and I didn't have words to describe it.
3. I was listening to a Shawn Bolz podcast, and I was getting depressed that I had to work at a job that I have a strong memory of hating, while I was listening to someone who I could tell really liked what he was doing. That meant that I also had to fight getting into coveting his life-space. But fortunately that part wasn't too difficult, thanks to “Him Who is able to keep me from stumbling”.

I haven't liked what I am doing, and where I am doing it, since I started working at (G6) fifteen years ago. And since my surgery I continue to have to force myself to work through pain. And I continue to be a disabled worker.

But I can also say for fact-certain that I have witnessed an overthrow of Hell and its resources at (G6) in many ways, and the Kingdom of Heaven come in to take its place. I am grateful for that.

I also learned last night at work from angel Gabriel that from the inception of the housekeeping pager system at the hospital, each pager had a demon assigned to it. I thought only the Lead pager was corrupted, which we had delivered within the past year. But the Lord used a pager malfunction to bring up this subject later in the shift. After asking him, Gabriel said that the other pagers had been delivered when the Lead pager was delivered.

As I write this Letter, Gabriel pointed out that the reason I felt strange was because I was accessing certain emotions in my soul that I wasn't able to feel before my surgery due to all the spiritual warfare I had been engaged in at (G6).

Friday, 23 September 2016, 6AM.

The strange feelings continue, but not as bad. However I have severe pain in the muscles and soft tissue surrounding both hips. Gabriel says this is due to the intercession we engage in for the United States, specifically leading up to the election in November. He also says the pain will go away after the election.

But the new Shawn Bolz audio helps a lot. I like his message, and I get to hear, in bits and

pieces, some recent Church history in his testimony. Its all pretty interesting.

When I returned to work a week ago, I discovered from (P10) my supervisor that I received a raise. And, since it was my 15 year anniversary on 19 July, I also received a 15 year pin and gift cards equalling \$75.00. Just wanted to say, "Thank You", for that stipend.

*And of course, as soon as I made up the word "NoWhereLand", one of my angels started singing the Beatles song, "Nowhere Man".

Blessings...

R. C. Theophilus
