

Letter 533  
**Calling An Audible Sign**  
2016-10-30

Dear **Jesus**,

There was a particular sign that angel Gabe developed to authenticate whether it was actually him I was meeting with. This came about in stages, and was only used a few times.

My recollection of what I am about to describe is not 100% clear. My memory of the sign itself is clear, just not the sequence of events in which the manifestation was used.

This came as a sort of hiccup that he would cause me to have at certain times when I would be speaking.

The first time it happened I was listening to a song on the CD audio system in my truck. Gabe was in the truck cab with me. Suddenly both the song on the CD and I hiccuped together at the exactly same time.

Some days later I was driving to the store or something. I picked up a man and woman couple who were hitchhiking a ride into town. They both got into the back of the truck. A minute later the same thing happened as before. Both me and the CD audio hiccuped at the same time. I knew then that the man in the back of the truck was Gabe.

This sign happened at least one other time that I can remember.

Blessings...

R. C. Theophilus
