

Letter 737  
**Medicare Malfunction**  
**Part 2**  
2018-12-22

Dear Jesus,

**Friday, 14 December 2018, 10PM.**

Throughout the night after I made the call to technical support, I began to both perceive and discern many issues regarding Medical Supply Companies which have a business relationship with Medicare.

Medicare is a type of U. S. Federal Government Managed Medical Insurance specifically for United States Citizens who are 65 years of age and older.

(M) turned 65 last January. Ever since that time I have acted as her business manager with respect to all things related to Medicare. I performed the research and executed the application processes. Along the way, I discovered many things.

One of the things I found is that Medicare is actually a Government subsidiary of CMS, the Centers for Medicare & Medicaid Services.

I also found that Medicare has 2 primary components; Part A Hospital Insurance, and Part B Medical Insurance. These two plans are also referred to as Original Medicare.

Drug Coverage, called Part D (Private Drug Plan), is managed by Medicare authorized private insurance companies.

Then there is Part C, which is a scheme whereby Parts A, B and D are totally managed by third party private insurance companies, authorized by Medicare to do so.

I discovered a website which clearly defines all these terms: <https://www.medicareinteractive.org/get-answers/medicare-basics/medicare-coverage-overview/filling-gaps-in-medicare-coverage-and-getting-help-with-medicare-costs>.

The quotes below taken from the site do an excellent job in explaining what I am trying to say.

**Supplemental insurance (Medigap):**

*"A Medigap policy provides insurance through a private insurance company and helps fill the cost-sharing gaps in Original Medicare, for instance by helping pay for Medicare deductibles, coinsurances, and copayments. Depending on where you live, you have up to 10 different Medigap plans to choose from: A, B, C, D, F, G, K, L, M, and N. (Note that plans in Wisconsin, Massachusetts, and Minnesota have different names.) Each type of Medigap offers a different set of benefits. Premiums vary, depending on the plan you choose and the company you buy it from."*

**Stand-alone Medicare private drug plan (Part D):**

*"If you have Original Medicare and want Medicare drug coverage, you need to sign up for a private drug plan (PDP). All Medicare drug plans have different costs and a different list of drugs that they cover (known as the formulary). Make sure the plan you choose covers the drugs you need at a cost you can afford. Also know that if you do not sign up for a Part D plan when you first become eligible, you may incur a premium penalty later on."*

**Medicare Advantage Plan:**

*"These plans contract with the federal government to provide Medicare benefits. They must provide at least the same set of benefits offered by Original Medicare, but may have different rules, costs, and restrictions. For instance, Medicare Advantage Plans may require that you see health care providers in their network, and/or that you get a referral from your doctor before seeing specialists. Some private health plans offer extra, Medicare-excluded benefits, such as vision or dental care. While premiums may be low, service costs may be higher than in Original Medicare for certain services (or vice-versa). You also may pay more for your care if you do not follow the plan rules. Medicare Advantage Plans must have annual limits on out-of-pocket costs. Although these limits are usually high, they should protect you from excessive costs if you need a lot of health care. Benefit packages may change every year, so it is important to review your current coverage and options annually."*

There are also insurance plans available which help those with limited incomes. (M) and I do not qualify, so that part is not included in this research.

Ever since 1973 when abortions were made legal in the United States, the Satanic influence toward and subsequent control within various branches of the U. S. Government has increased, especially in the World of Medicine.

This has led to the incursion of demonic spirits of all kinds into the relationship that the U.S. Government has with itself, with U.S. Citizens, and with the rest of the world. This is because abortion is the shedding of innocent blood. And innocent blood demands Justice. Without Justice, fissures to and from Hell are opened, and remain open.

It is primarily because of this increase of demons, and their fallen angelic handlers, that We The People of the U. S. have become divided into many camps of different kinds.

Since 1973 there has been so much blood-shed perpetrated by the U. S. Government (and that includes We The People, who choose to remain complacent about the issue), that almost anywhere there is a relationship between United States citizens, there is a dwelling place of demons, which adversely effect that relationship.

This is certainly the case with Medicare and all it touches. This is why it has become so bureaucratic. This is why companies who choose to do business with Medicare eventually will treat Medicare patients as inferior, because the demons within the relationship are themselves inferior.

And so it was that when I began to inform the medical supply house with which we do business of (M)'s having Medicare Insurance, we were then placed, knowingly or unknowingly, on a lower, second tier of customer service treatment.

The O2 concentrator which was initially delivered had been cursed by a demonically influenced human, and subsequently failed to work. And while it did get rectified quickly, it need not happen at all.

We will be seeking You in the days ahead for a short term remedy, and a long term solution, so that the fissures from Hell can be closed, and willful abortion become regarded as murder.

P. S. Over the years HR has succeeded in building up and protecting its House of Abortion. This House also needs to be destroyed.

P. P. S. The operating noise of the replacement machine is within acceptable limits, so (M) gets a good night's sleep. Thank You Jesus.

Blessings...

R. C. Theophilus
