

Letter 833  
**HR's War Against Tansy Dog**  
*(And All Other Creatures)*  
**Part 1**  
2019-12-12

Dear **Yeshua**,

**Sunday, 8 December 2019, 5PM.**

Tansy Dog, one of our purebred miniature Schnauzers, was assaulted and severely injured by HR. This was part of Satan's earlier ongoing personal directive to HR against me and my house. Even though the Devil himself can no longer communicate with HR at this time (see [Letter 214 Volume 4](#)), his previous plans and orders to HR continue to function, and will do so until they are all stopped and destroyed (see 1 John 3:8). Please permit me to explain.

In [Letter 450 Volume 6](#) (6 March 2016) I write about two dreams in which the Lord Holy Spirit reveals a fallen angel who is attempting to corrupt me with a false message. Part of this message involved a direct assault against our Tansy Dog.

According to the Lord, Tansy's illness with pancreatitis/diabetes was a direct result of the latent word from that fallen angel. It took three years for the message from HR to germinate and come to fruition, thereby causing Tansy to become ill.

But it was also the Lord Himself Who, at that time in 2016, revealed the assault from HR in the two dreams, so that I would have the right intelligence, which would then inform my prayers to Jesus at my time of need, asking Him to intervene and heal my little dog.

In the days before the discovery of her illness, Tansy had been exhibiting signs of listlessness. Then she got sick and couldn't hold down any food. When Saturday came, it had become clear that she needed expert help which was beyond my ability to give. Upon inquiring of the Lord, I knew the right course of action was to take Tansy to the Veterinary Clinic.

On Saturday, 16 November 2019, I took Tansy to the veterinary clinic. But sometime in the preceding week, the Lord led me to anoint Tansy with oil, and as I did, I prayed for her in the tongue of a Faithful Angel (which I have been doing a lot of lately).

It was at the clinic where she was diagnosed with diabetes, and I was informed that her condition was emergent, and that she needed to be taken to the Animal Hospital that same evening. Tansy was in hospital until Tuesday, 19 November, when I was able to take her home with medications and instructions for care. Since then, I have been feeding her a low-fat diet, and giving her insulin injections twice a day.

But throughout this time I also entered into a theater of spiritual warfare which was new to me. I will attempt to explain this New Battlefield in Part 2.

Blessings...

R. C. Theophilus
